

Selecting your Workers Compensation insurance company is serious business. That's because Workers Compensation is a complicated and specialized field. You need to feel confident about how your obligation to provide for medical and rehabilitation expenses, compensate for lost wages and pay benefits to surviving family members will be met.

And confident you will be when you select **Society RewardsSM** – with its uncommon array of services from the specialists in Workers Compensation, **Society[®] Insurance**.

We're not just another multiline insurance company. **Society Insurance** was founded in 1915 specifically to provide Workers Compensation insurance. Never content to run with the pack, we've continuously prospered providing this sometimes difficult type of coverage. Whether large or small, employers receive uncommon value by insuring with **Society Rewards** – the program that offers you uncommon solutions to your Workers Compensation insurance needs.

Society Rewards Keeps Your Costs Down.

The cost of your Workers Compensation obligation is a function of many factors. The first variable is the average cost of injuries in your class of business. The second factor, and perhaps the one that can most dramatically affect your cost, is the frequency and severity of recent employee injuries in your business. The final component is the track record of your insurance company.

Look around. You'll see the results from Workers Compensation lines vary depending upon the insurer. And you'll also find Society has a history of paying competitive dividends or offering competitive premium reductions, depending upon which method is permitted by the state laws. It's a sure sign of the strength of our company and a promise of value to you.

Our Thorough Claims Investigation Saves You Money.

Expert claims handling is our hallmark. We dig into every claim to make sure that injuries are indeed work-related. We do this by carefully analyzing medical histories and treatments in detail. This, combined with a thorough understanding of the law and claims administrative process of the state, means the potential for fraud and abuse of the system are minimized. With **Society Rewards** you know that legitimate claims are being paid, while others are not.

Society Rewards Helps You Control Medical Costs.

We believe patients should receive as much quality medical care as will help them heal. Additionally, we feel strongly that Workers Compensation should pay only for the treatment of work-related injuries and that this care should be provided at a fair price. That's why we're affiliated with a Preferred Provider Organization (PPO). A PPO can provide quality medical care at lower than customary rates because of its contract with physicians, hospitals and others. Its medical review teams monitor hospitalizations and home health care cases to make certain your employees receive appropriate medical care at reasonable costs.

SOCIETY REWARDSSM
WORKERS COMPENSATION

And We Help Your Employees Return to Work.

Early return to work, even in a limited or light capacity, helps to reduce the cost of work-related injuries. An early return to work not only reduces the direct cost of lost wages, it also helps employees heal faster and increases their odds of a full recovery. In addition, an early return to work greatly reduces the cost of substitute employees and employee replacement. As you can see, having an effective Return to Work Program is extremely important. That's why Society works with you to design and implement the program that's best for both you and your employees.

Plus, We Help You Control the Risk of Injury.

The process, commonly referred to as "loss control," reduces the frequency and severity of injuries. First, our risk control representatives who are trained and experienced in finding solutions to a wide range of safety and health challenges take the time to carefully study your business. After they identify hazards in your operation and carefully analyze your employee injury history, they work with you to implement safety programs. These programs can help you comply with OSHA standards, control fleet loss, improve the ergonomics of your processes, educate and train your key staff members, and implement Safety and Health Incentive Programs.

Uncommon Array of Services.

While Workers Compensation is our specialty, our expertise also extends into other arenas. We offer property, casualty, automobile, and umbrella insurance to a wide range of businesses. With Society you can simplify your life by having all of your property and casualty insurance needs handled by one trusted company. In many industry groups, Society is recognized as the leader in multiline coverage. We've even had the honor of being awarded trade association endorsements or corporate sponsorships from the following organizations:

- Wisconsin Restaurant Association
- Wisconsin Medical Society
- Tavern League of Wisconsin
- Iowa Hospitality Association
- Wisconsin Association of Meat Processors
- Iowa Lodging Association
- Wisconsin Grocers Association
- Illinois Licensed Beverage Association
